

Integrated Logistic Support (ILS) Overview

Description:

Integrated Logistic Support (ILS) provides the disciplines for ensuring that supportability and cost factors are identified and considered during the design stage of a system or equipment with the aim of optimising the Whole Life Cost (WLC).

The course provides a top level overview of ILS, why the MOD mandates it, the principal elements and processes involved and the benefits that can be realised.

Aim:

To provide the delegate with an appreciation of Integrated Logistic Support.

Duration:

1 day.

Pre-Requisites:

None.

Designed For:

Corporate, Management, Project or Sales personnel with no ILS knowledge.

Course Content:

The course covers the following topics:

- The need for ILS
- The origins and concept of Def Stan 00-60
- An overview of each ILS element/discipline
- The ILS goals
- The CADMID process
- LSA and LSAR activities
- Key issues affecting the implementation of ILS
